

Levittown Public Schools

November 2014

Configuring Remote Desktop for Mac, iPad, iPhone or Android Device

PURPOSE: The Microsoft Remote Desktop Application allows access to the same files and applications when at Levittown Schools from home.

UPDATE: Version 8.1 is out for iPad and iPhone, see end of document – Version 8.1.

Configuring Remote Desktop (applies to Version 8.0 available to most platforms)

1. Download the *Microsoft Remote Desktop App* from the store (App or iTunes).

2. Launch the Microsoft Remote Desktop App.

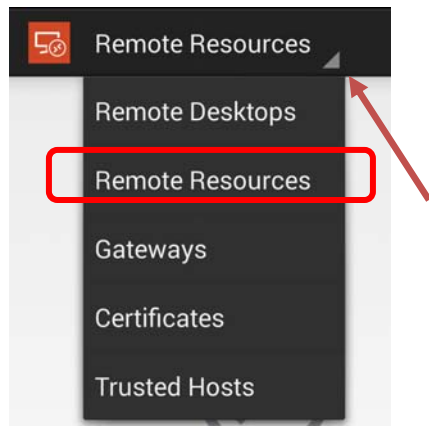

3. Click **Remote Resources**.

a. **Mac:**

b. **iPhone, iPad:**

c. **Android:**

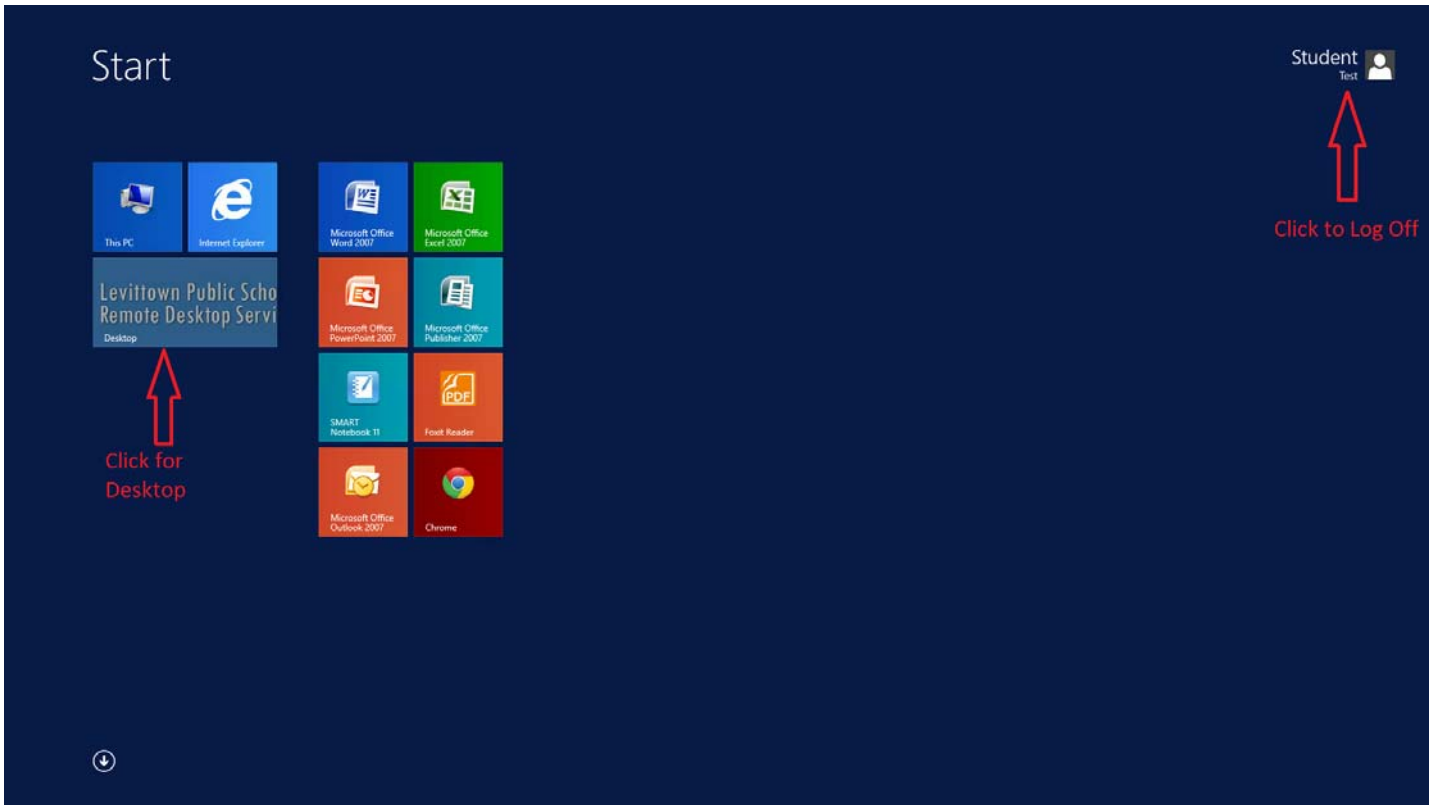

4. Enter in the URL as remote.levittownschoools.com. Enter in your username (e.g. ACADEMIC\jsmith or ADMIN\jsmith) and enter your password, then hit refresh:

A screenshot of a 'Remote Resources' dialog box. The title bar says 'Remote Resources'. There are three input fields: 'URL' with the text 'remote.levittownschoools.com', 'User name' with the text 'ACADEMIC\barker', and 'Password' with three dots. Below the input fields is a 'Refresh' button.

5. Click on the Desktop as seen below (or on a particular remote app that you would like to use):

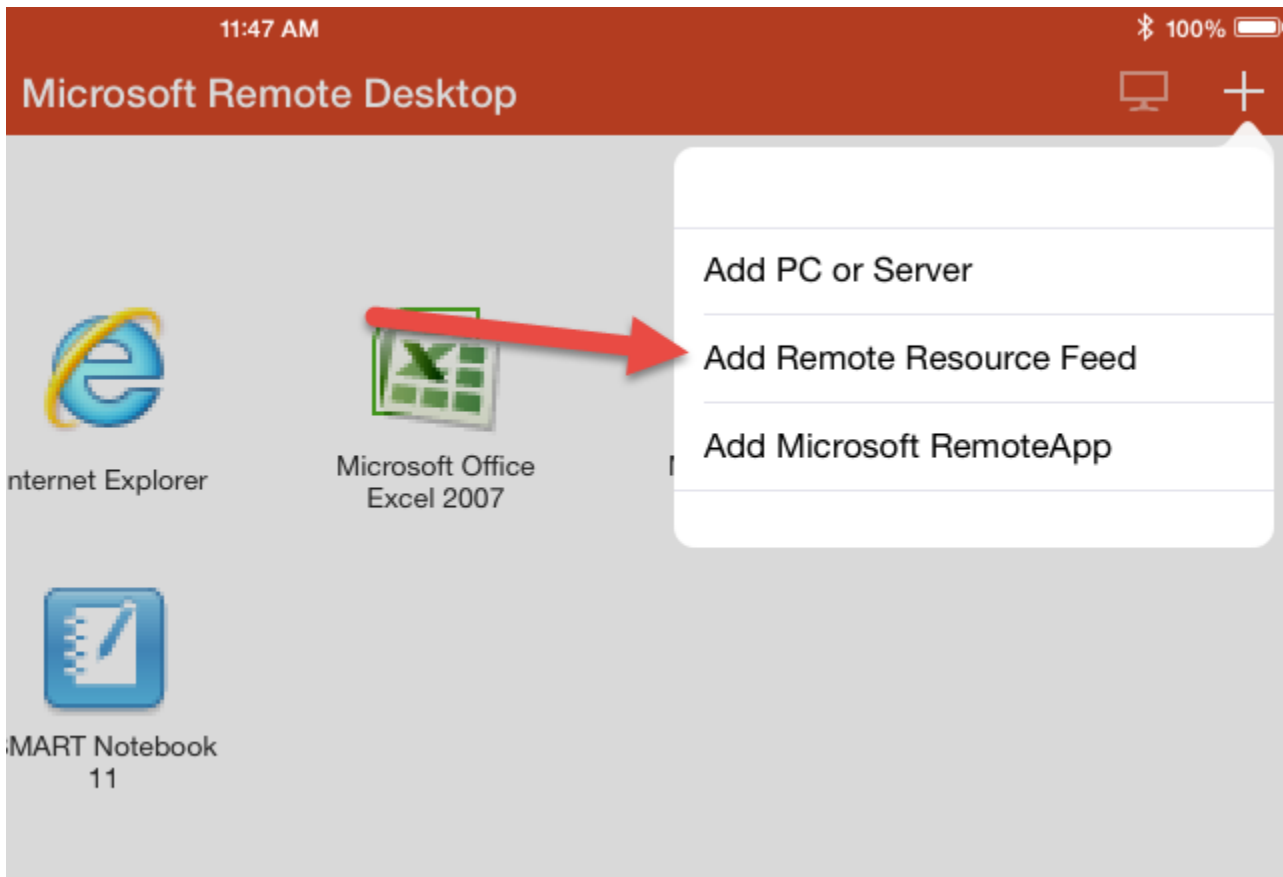

Your computer is now set for remote access.

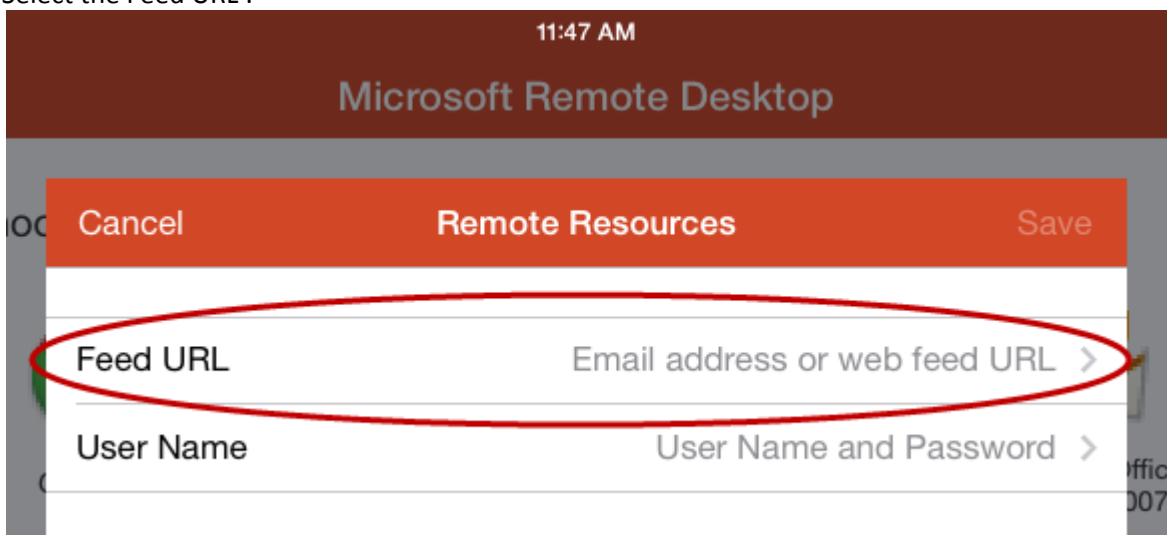

Version 8.1

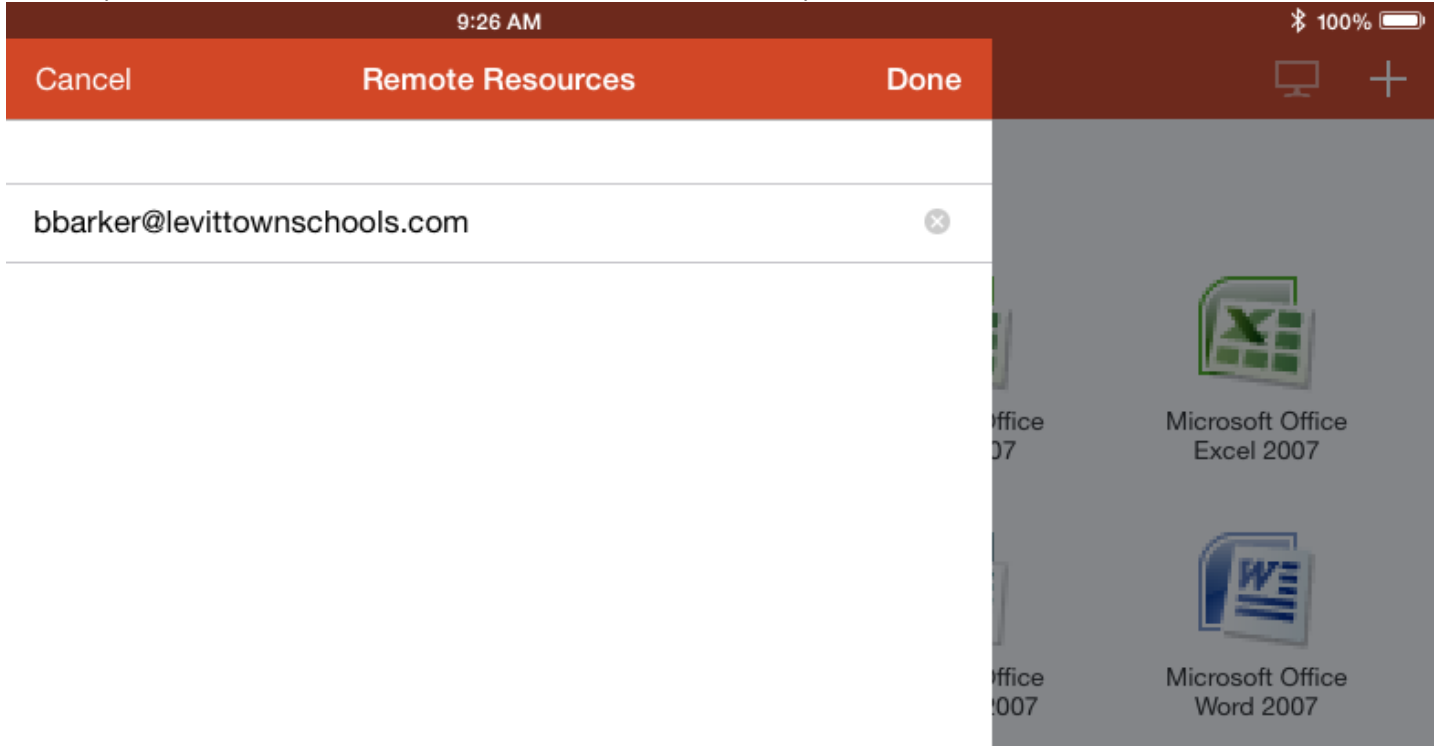

For iPad and iPhone, version 8.1 has been released. This affects step 4 from above. You will either have to enter in your email address or if you don't have one, enter in your username@levittownschoools.com as seen below. Click to add a Remote Resource Feed:

Select the Feed URL :

Enter in your email address or username@levittownschoools.com if you do not have an email address:

Proceed with other steps as normal.
